### **Last Frontier ARS Now Offering On-Demand Testing**

*Partnership with HamTestOnline to bring customized remote testing exclusively for their patrons.*

---

**Kodiak, Alaska – February 6, 2024** – On Tuesday, February 6th, 2024 the Last Frontier Amateur Radio Society officially launched a revolutionary service in license testing. That is, to offer custom remote examinations for active patrons of HamTestOnline.

What does this entail? We are offering a streamlined process where patrons of HamTestOnline fill out a short application where a date and time are requested. Their requested date and time would need to be at least 48 hours in advance of their requested session. With active Volunteer Examiners spanning five time zones and growing, our ability to meet the needs for anyone in the United States will set us apart from other testing organizations, especially as our program continues to grow.

Through careful integration of the exam platform we use called Wireless Exam Gen, our trailblazing effort will make remote testing more accessible than ever before. Our custom exam service that is being offered exclusively to HamTestOnline patrons will ensure they have a means to test from the comfort of their own home using an exam platform that has a proven track record of performance in some of the world's most remote locations, namely Antarctica.

Last Frontier Amateur Radio Society's desire to take this giant step in our license testing service is a testament to hard work, dedication and drive to providing an unprecedented service to every corner of America. HamTestOnline's partnership with us provides a "proof of concept" of making the impossible a reality. This is a service unique to all current amateur radio exam prep courses and we are thrilled to call HamTestOnline our partner in being the first to offer this service.

A banner advertisement is on display throughout HamTestOnline's website, as well as them specifically listing our service on their page entitled "Where to Take the Ham Radio Exam?" which links to a page on our website that clearly outlines our simple requirements in advance. Our common approach of delivering a lightweight service that can be deployed anywhere makes this partnership one of the most unique in amateur radio today. It is a privilege to have a partnership with a study outlet that believes in providing a top notch service to America's underserved population, following in line with our mission which is to "serve the underserved".

Originally founded on November 8th, 2022, Last Frontier Amateur Radio Society (formerly Last Frontier Volunteer Examiner Club) aims to serve the community of Alaska and beyond by providing amateur radio license testing and opportunities for social connections. Located in Kodiak, Alaska, Last Frontier Amateur Radio Society's Mission Statement is "...To serve the amateur radio community throughout Alaska and beyond with honesty, integrity, sound leadership, compassion and respect in the act of selfless service to anyone, regardless of physical location." More information about Last Frontier Amateur Radio Society can be found at <https://lfars.net>.

HamTestOnline was created in August 2002 to serve as a resource for those who desired an alternate method to study for their amateur radio license. Based in Gilbert, Arizona, the mission statement for HamTestOnline is "...to provide the best study method, study materials, customer support, and guarantee in the industry!" HamTestOnline prides itself in offering top notch customer service, support and a 100% money back guarantee on any service purchased, which is a first in the industry. More information about HamTestOnline can be found by going to their website <https://www.hamradiolicenseexam.com/>.
