Last Frontier ARS Offering Free Exams For The Month Of June 2024

Last Frontier ARS is offering free exams to applicants during the month of June 2024.

Kodiak, Alaska – May 3, 2024 – During the month of June 2024, all applicants who would like to test with Last Frontier Amateur Radio Society may sign up for any of our regularly scheduled exam sessions.

As a result of a fundraiser that was held at the beginning of 2024, we were able to raise enough funds to cover free examinations for a month! Understanding this, we did some math and if all of our regularly scheduled sessions for the month of June are full, this means we would be able to serve a grand total of 69 applicants altogether.

Why is this important to us? Simple. We strive to find innovative ways to always give back even more than before. In doing so, it lays a beautiful foundation that clearly shows our heartfelt commitment to serving Alaska and beyond with humility and grace in all we continue to do.

With regards to our free examinations for the month of June 2024, it must be stated that our on-demand applicants will be required to pay the standard \$15.00 exam fee as this service is highly specialized. Should HamTestOnline users want to take advantage of our free exam offerings during the month of June 2024, they are encouraged to sign up for any of our regularly scheduled exam sessions.

Originally founded on November 8th, 2022, Last Frontier Amateur Radio Society (formerly Last Frontier Volunteer Examiner Club) aims to serve the community of Alaska and beyond by providing amateur radio license testing and opportunities for social connections. Located in Kodiak, Alaska, Last Frontier Amateur Radio Society's Mission Statement is "...To serve the amateur radio community throughout Alaska and beyond with honesty, integrity, sound leadership, compassion and respect in the act of selfless service to anyone, regardless of physical location." More information about Last Frontier Amateur Radio Society can be found at <https://lfars.net>.
